# Swaying Your Audience

- “They don’t know what they don’t know”
- Own the topic, you are the guru
- No one can tell the stories of your department like you
- Inspire emotions, but watch your emotions
- You can argue against an opinion, it is hard to argue against a statistic
- Stats get conversations going...in many cases, you want a conversation happening
- Find an “advocate” to help you when you’re not around
